

Isthmus Montessori Academy
PEST CONTROL PROCEDURES

Isthmus Montessori Academy (IMA) is proud of its environmentally safe and clean school. IMA has established an integrated pest management plan that provides for notification of students, parents/guardians, and employees when application of pesticides to school buildings will take place.

Integrated pest management programs are designed to identify and eliminate conditions in the school that could cause pests to be a problem. Applications of pest control materials are made only when necessary to eliminate a pest problem. Regular spraying is not a part of the program.

If it becomes necessary to use any pest control products other than traps or baits, a notice will be posted at least two business days prior to the application. The only exception to the two-day notice would be if there is an immediate threat to health or property. Then a notice will be posted as soon as practical. If you would like to receive written notification prior to the application of pest control materials subject to the notification requirements, please complete the form at the bottom of the page and return it to the school.

IMA will only contract with licensed applicators to provide pest management services. If you have any questions about the information and procedures, you may contact the school administration at (608)661-8200, Thank you.

I would like to be notified two days before the use of liquid or aerosol pest control materials at the school. I understand that if there is an immediate threat to health of property that requires treatment before notification can be sent out, I will receive notification as soon as practical.
